

IT Resiliency Gap Assessment

Service Overview

Are your core technologies adequately resilient?

Quintillion's resiliency gap assessment flips the traditional assessment on its head by assessing your infrastructure first. We will help you define requirements for your critical infrastructure and IT services, assess whether your technology solutions provide adequate resiliency, and provide prioritized recommendations for gap remediation.

This is tremendously valuable Disaster Recovery starter project for organizations looking to baseline their IT resiliency capabilities.

Value Proposition

1. Defined performance requirements for core data center technologies
2. Identified gaps for critical infrastructure
3. Prioritized recommendations for gap remediation
4. Affordable price tag for high value
5. Rapid delivery timeframe

Deliverables

1. Validated Infrastructure Inventory
2. Defined Performance Requirements
3. Actual Capabilities Defined
4. Baseline for Application Assessment
5. Gap Analysis
6. Report with Visuals OR Executive Summary Presentation
