

NIST CSF Maturity Assessment

METHODOLOGY

Our experts drive efficiencies in data collection, leveraging our proven methodology

SIMPLIFIED DEFINITIONS

Control definitions for all 108 NIST CSF subcategories

CUSTOMIZABLE

Quintillion offers options to adjust the size and scope of the maturity assessment

Assessment Process

Quintillion Consulting has developed a unique and highly efficient methodology to assess your organization's level of security maturity against the NIST Cybersecurity Framework [NIST CSF].

We've reviewed the NIST CSF informative reference mappings [ISO 27001, COBIT, NIST SP800-53, CIS Top 20, and CMMC], and removed the complexity by developing control definitions for all 108 subcategories that are concise and easy to understand.

Our proven assessment methodology is designed to drive efficiencies in data collection, and our analysis / reporting provides highly detailed observations about current state maturity and actionable strategic recommendations for remediating observed gaps against security best practices.

EVALUATE Maturity

Assesses how mature your organization is today and define what level of maturity you should strive for.

IDENTIFICATION Gap Analysis

Identifies gaps in your cybersecurity program across people, processes, technology and scope.

ACTIONABLE Recommendations

Highly detailed strategic recommendations and analysis will help improve your organization's security maturity.

Best of all, our approach is flexible and customizable to fit your organization's needs.

NIST CSF Maturity Assessment

METHODOLOGY

Our experts drive efficiencies in data collection, leveraging our proven methodology

SIMPLIFIED DEFINITIONS

Control definitions for all 108 NIST CSF subcategories

CUSTOMIZABLE

Quintillion offers options to adjust the size and scope of the maturity assessment

Value Proposition

- Independent and objective view of your current state security maturity
- Flexible and customizable methodology
- Concise and easy to understand NIST CSF control definitions
- Efficient data collection and analysis
- Detailed observations and recommendations

Deliverables

- Control requirements for all 108 NIST CSF subcategories
- Standardized interview templates
- Maturity scoring framework, criteria, and approach
- Maturity scores for all 108 NIST CSF subcategories
- Documented observations and recommendations for all NIST CSF subcategories
- Full data set, documenting assessment results
- Summary analysis tool, depicting assessment results
- Executive reporting
